

MOBOTIX NurseAssist Solution

Intelligent fall detection – All Day Real-Time Support

Optimal support for care staff and residents: The MOBOTIX room ceiling sensor, developed in collaboration with Kepler Vision Technologies, provides care facilities with a powerful and reliable solution to ensure the safety and well-being of their residents 24/7. Thanks to the **intelligent** MOBOTIX c71 NurseAssist **sensor** and the optionally available function and software extensions, incidents and critical situations can be automatically detected in real time and reported directly.

Automatic fall
detection and
alarm

Bed exit and
leaving the room
detection

Decentralized and
GDPR-compliant
video analysis

Easy integration into
MOBOTIX HUB and external
nurse call systems

More safety and relief for care staff and residents – **find out more!**

Powerful functions of the MOBOTIX c71 NurseAssist Smart Sensor

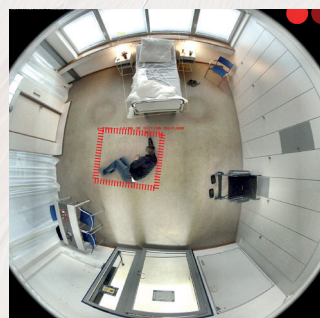

The **innovative Smart Sensor** has a wide range of functions that have been developed to provide optimum care support:

- **360° all-round view** without blind spots thanks to a hemispheric sensor that automatically detects falls and anomalies.
- **Data protection and privacy:** GDPR-compliant technology that works without image storage and with dynamic masking to protect the privacy of residents.
- **Extended license:** Extended monitoring functions such as detecting sitting positions at the edge of the bed, leaving the room or unusually long stays in the bathroom - critical indicators for preventive care.
- **Simple integration** into existing infrastructure thanks to open API interfaces and easy integration into existing nurse call systems (e.g. Ascom or IQ Messenger).

Detection and targeted alarming

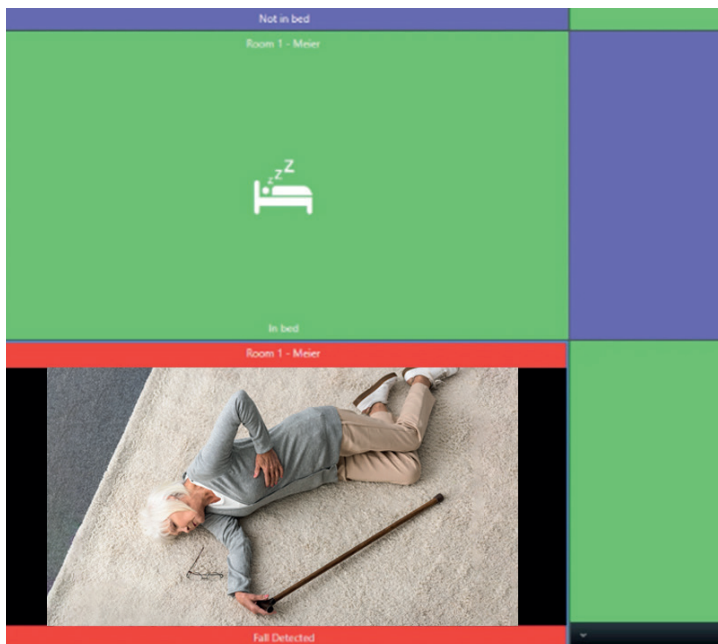

360° all-round view without blind spots

Quick help and **less stress** for care staff

- Thanks to automatic detection and targeted alerting, the burden on care staff is reduced and false alarms are minimized. Incidents are detected immediately, reducing time-consuming routine monitoring and making care more efficient.

Integration in MOBOTIX HUB and external nurse call systems

The MOBOTIX c71 NurseAssist Smart Sensors of a facility can be **flexibly integrated** into the MOBOTIX HUB platform and enable centralized monitoring of multiple rooms or residents via a single dashboard:

- **NurseAssist Dashboard plug-in in MOBOTIX HUB:** Nurses receive a clear display of alarm signals and behavioral patterns in real time, enabling an immediate response.
- **Activity reports and status messages:** Behavioral patterns and relevant data for care and disease progression can be easily analyzed to adjust nursing measures accordingly.
- **Simple expansion and scalability:** In combination with MOBOTIX security cameras and access control systems, the HUB platform offers a future-proof overall solution.

Seamless integration into external nurse call systems

Thanks to **API integration**, the MOBOTIX c71 NurseAssist sensor can also be **easily integrated into existing nurse call or alarm management systems** so that nursing staff receive NurseAssist notifications directly via the usual communication channels.

Benefits of the MOBOTIX NurseAssist solution - Made in Germany

Increased safety and early prevention

- Precise fall detection and extended alarm functions significantly reduce the reaction time of care staff.

Relief for care staff

- Automatic notifications and detailed event analysis enable targeted intervention, while routines are simplified.

Maximum flexibility and adaptability

- Scalable solution that can be integrated into smaller facilities as well as more complex systems to meet growing requirements.

Durability and cost efficiency

- The robust design and intelligent technology make the system a long-term and economical solution.

Technical data: 360° optical sensor for ceiling mounting • Integrated Kepler NurseAssist analysis software with optional extended license • Audio and microphone function for direct communication • Direct integration into MOBOTIX HUB with special NurseAssist dashboard • API integration for external nurse call systems.
