Use case – Nursing homes and senior residences

NurseAssist **application examples:**

- **Fall detection**

The sensor alerts care staff in the event of a fall so that help can be provided quickly. This minimizes the risk of serious injury.

- **Monitoring**

Detects the current status of the resident, whether in bed, on the floor or in a critical position.

- **Routine monitoring**

Round-the-clock monitoring of movement patterns in the room to detect irregularities at an early stage and ensure the health of the resident.

Benefits:

- ✓ **Minimal space requirement** when installed on the ceiling.
- ✓ **Proactive care** and **increased safety** for residents thanks to automatic status monitoring

Use case – Home care and assisted living

NurseAssist **application examples:**

- **Emergency alarm system**
In the event of falls or sudden health incidents, the nursing staff are alerted immediately.

- **Effective communication**
Direct contact with residents when the alarm is raised so that support can be provided immediately.

- **NurseAssist extended**
Optional additional license with even more extensive possibilities in the area of monitoring and security.

Benefits:

- ✓ Support for relatives through **automated monitoring** and **rapid notification in an emergency**.
- ✓ **Increased quality of life** and **safety for people** who live independently at home.

Use case – Hospitals and rehabilitation centers

MOBOTIX HUB offers with the free NurseAssist Dashboard a cost-effective and versatile Nurse-Call & Reporting System.

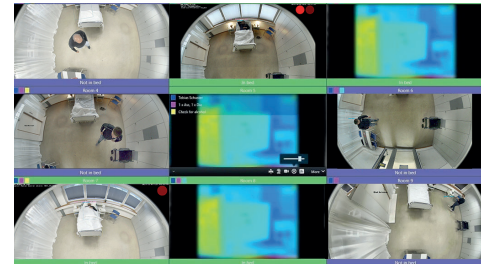

NurseAssist application examples:

- **Postoperative care**
Monitoring of patients after operations to optimally support recovery.

- **Tracking mobility**
Detection of movements in the room to optimize treatment.

- **Virtual tours**
Night checks without entering the room to leave patients undisturbed.

Benefits:

- ✓ **Increased efficiency of care staff** thanks to automated monitoring functions, which enable targeted interventions.
- ✓ **Reduced workload for nursing staff** who can focus on critical patients.
- ✓ **Easy integration** into existing hospital infrastructures (nurse call systems) for seamless monitoring and alerting.
