DORI Specifications

In the video surveillance context, "DORI" stands for Detection, Observation, Recognition and Identification and is based on IEC EN62676-4: 2015. These levels define the minimum pixels that a face of a person must have to provide proper identification, for example.

- **Detection:** Up to this distance, you can reliably determine if a person or vehicle is present.

- **Observation:** Up to this distance, you can see characteristic details of an individual, such as distinctive clothing.

- **Recognition:** Up to this distance, you can determine with a high degree of certainty whether an individual is the same as someone that has been seen before.

- **Identification:** Up to this distance, you can determine the identity of an individual beyond reasonable doubt.
